## Help and Support

Find additional resources and support contact information on Datameer's [Knowledge Base](#).

## Community Forums

The [Datameer Community](#) is a great place to get support, make suggestions, and find answers to your questions.

## Get Started Today!

There are multiple ways you can quickly get up and running with a Datameer evaluation, which require no existing infrastructure or Hadoop expertise. To start analyzing smaller volumes of data, you can run Datameer on a single machine, and seamlessly scale up as you add servers to your environment. To help you understand the capabilities of Datameer, we've provided pre-configured environments which require zero configuration.

### Turnkey Datameer environments:

- [Amazon EC2 and Datameer](#)
