

Spotlight + Snowflake

A Clear Path To Cloud Analytics

Organizations with complex data landscapes use Spotlight with Snowflake to bridge analytics teams and develop insights 20 times faster across the enterprise for blazing-fast analytics and data science.

What is Datameer Spotlight?

Spotlight is a cloud-first solution that provides analytics teams with easy access to enterprise data and analytics assets—regardless of data type or location. With Spotlight, you can discover, share, collaborate and analyze all of your corporate-trusted data to answer questions up to 20 times faster while bridging data silos without any duplication and IT assistance.

Maximize Your Snowflake Investment

Spotlight allows analysts at any skill level to rapidly combine and use Snowflake data with other sources to quickly and easily deliver new analytics. Your team will make best use of your Snowflake resources and migrate new workloads into Snowflake for greater ROI.

Avoid the Risk of Data Movement

Analysts and Data Scientists work with the same Snowflake data in real time. Explore and model data sets without the risk of moving data around and reuse data assets for the agile delivery of hybrid-cloud analytics

Capture Knowledge & Build Trust

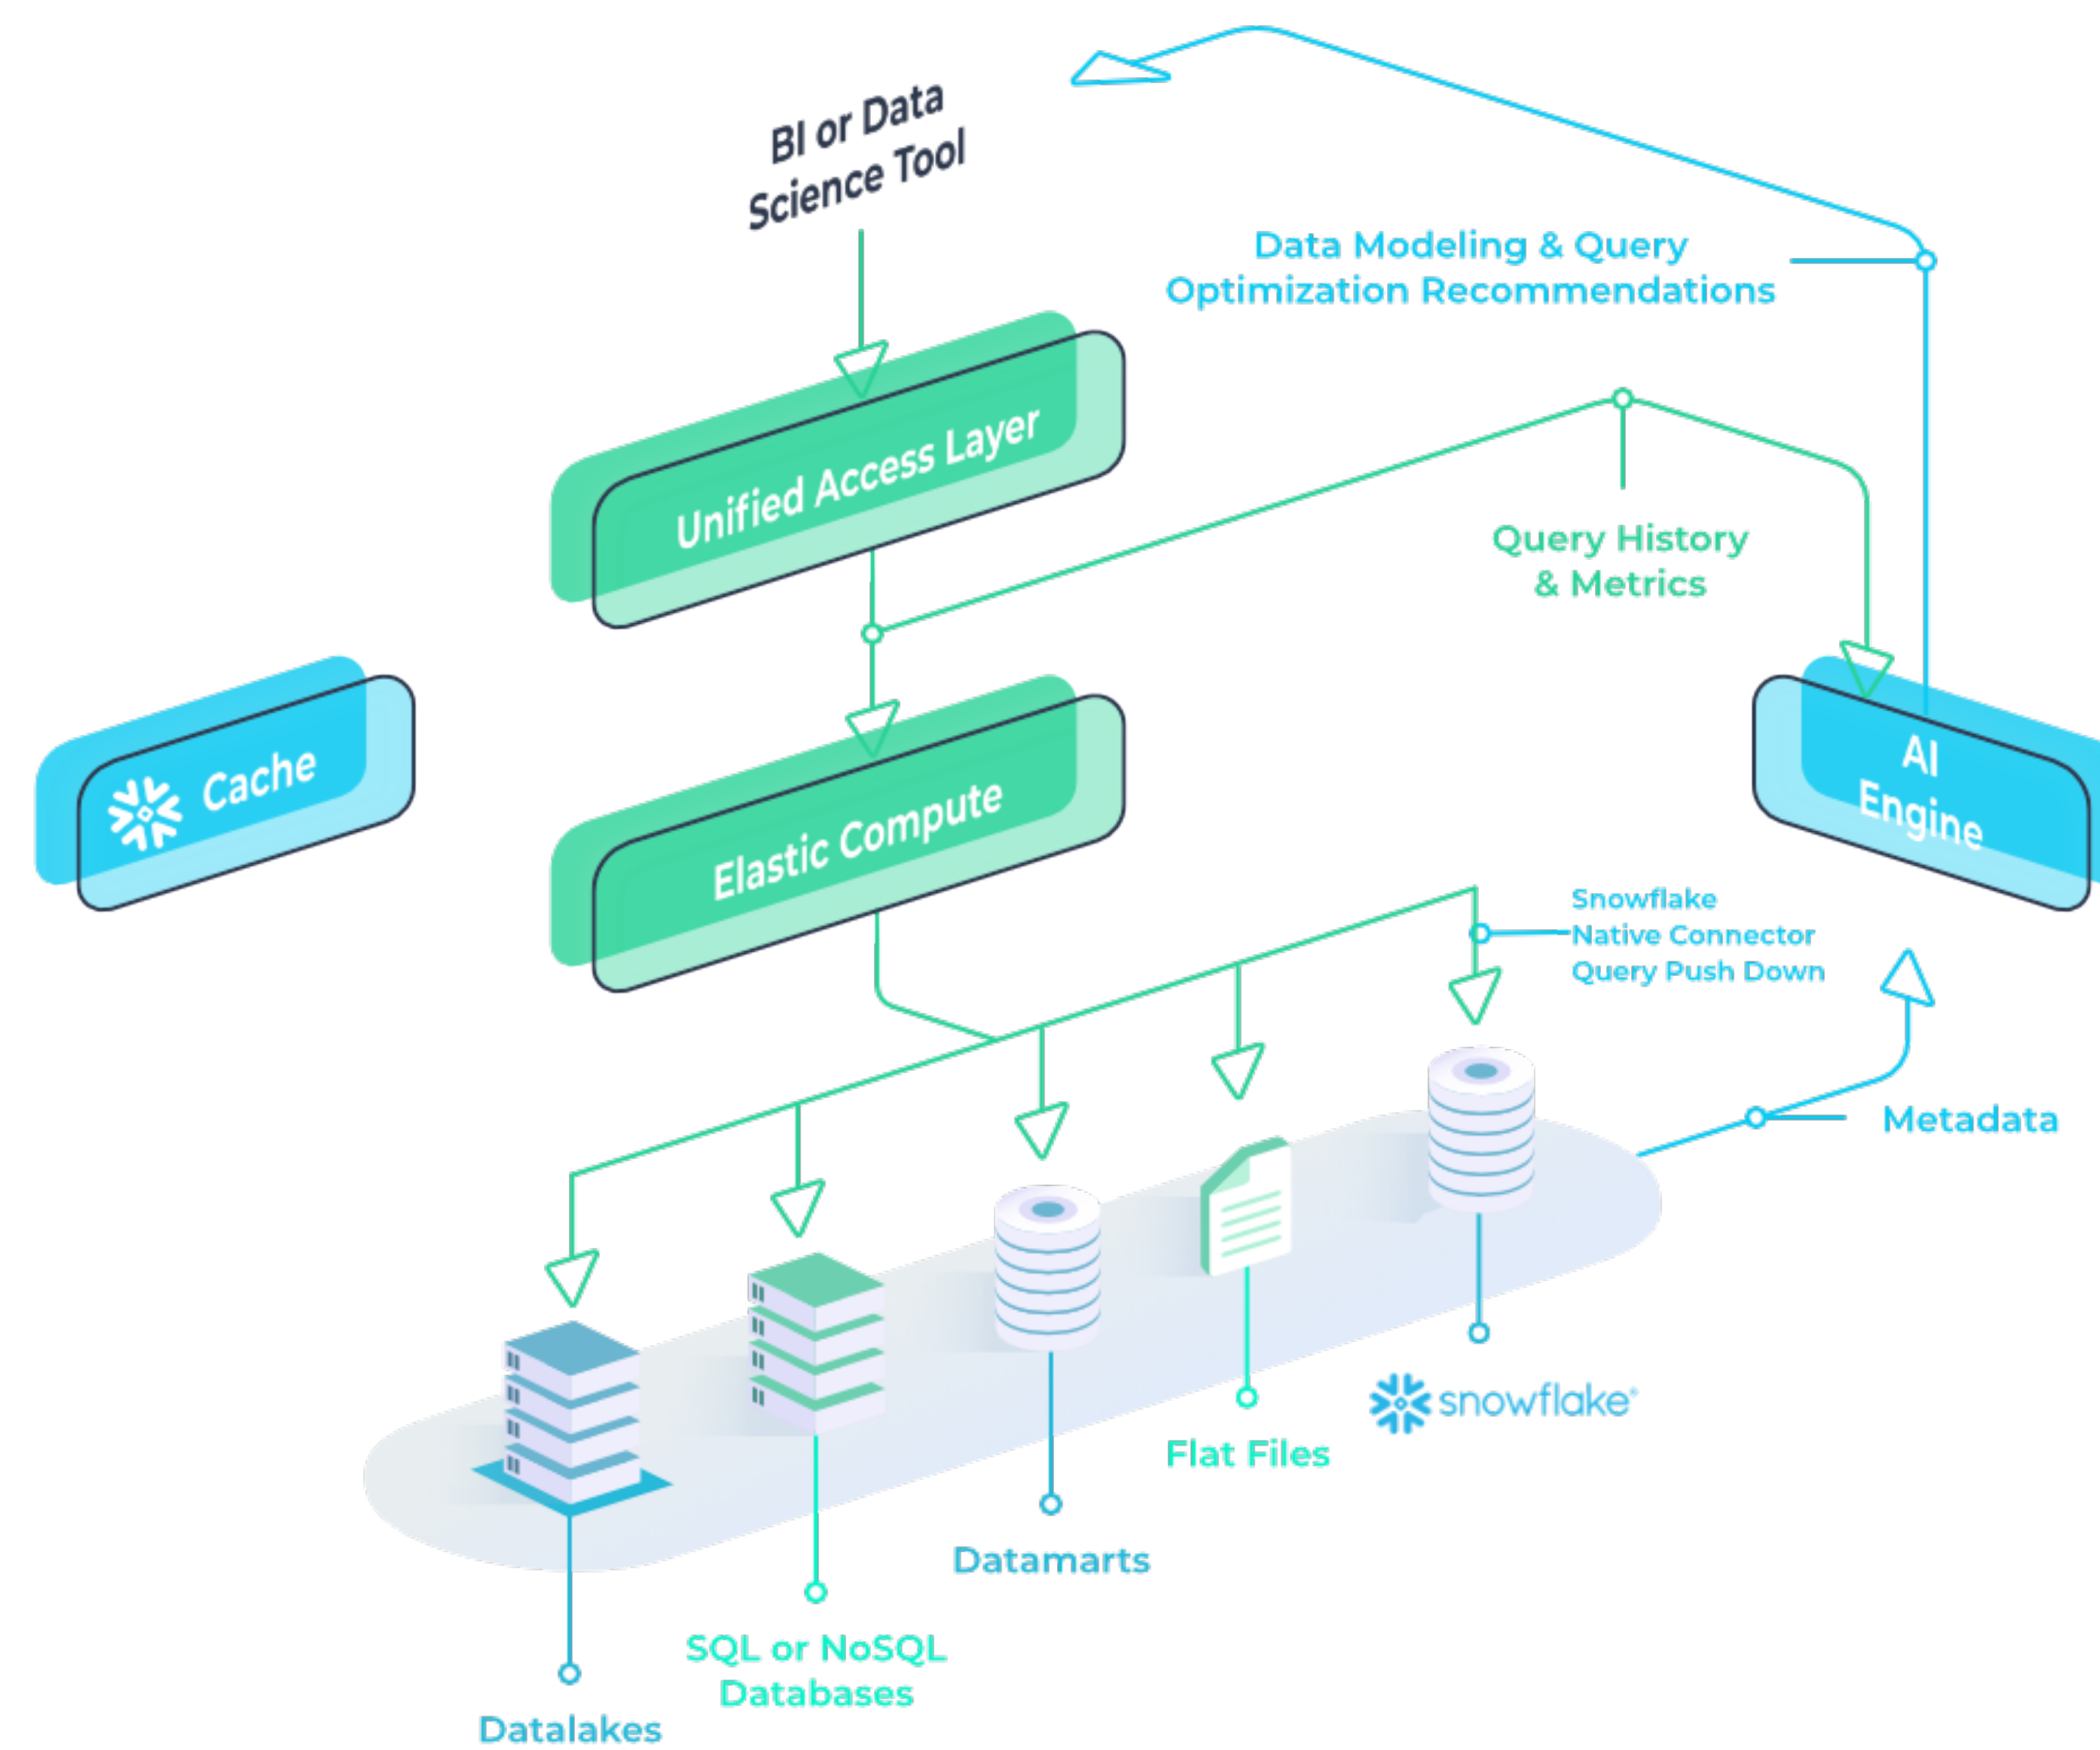

Spotlight captures valuable insights about your Snowflake data – see who, how, when, and why data is used. Through these insights, analysts find new ways to apply data to business initiatives, all directly in Spotlight, extending the value of your Snowflake investment.

Use More Data with Easy Discovery & Access

Improve time-to-value through the ability to find and use any data asset including your Snowflake data. Create valuable data assets by modeling new analytic problems collaboratively without the time of upfront data engineering. With Spotlight, discover and enrich Snowflake data with all your other data. As you discover data in your Snowflake warehouse, Spotlight's AI functions suggest the best ways to harness it.

Powerful Native Integration

Spotlight's access layer provides native Snowflake integration for you to query all of your data sources, no matter where they live. Manage workloads in Snowflake and push compute where it needs to go—on-premises or in Snowflake.

Datameer Spotlight was built for Snowflake

About Datameer

Datameer transforms businesses into agile, data-driven organizations by democratizing access to all enterprise data through secure, governed, business data pipelines with Spectrum, and virtual access, search, modeling and collaboration with Spotlight. Business and data analysts can immediately prepare and explore even the most complex, dispersed data, and instantly transform it into business consumable information, both on-premises and in the cloud.
